

Overview

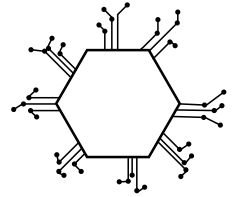

TERMINOLOGY

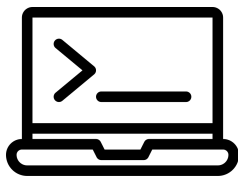

Input: the text or commands you give AI

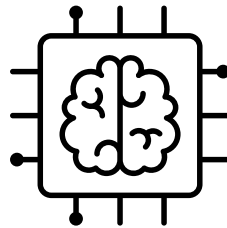

Output: What AI gives the user

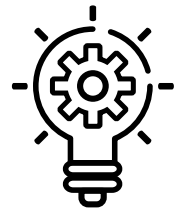

AI Models: The AI platforms that have different training

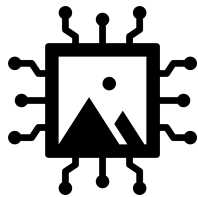

Prompts: The types of inputs you give AI

LLM: Large Language Models (AI Learning)

Prompt Engineering: Crafting inputs to guide AI's outputs

Generative AI: AI that creates new, original content or data

OpenAI: The organization that developed and maintains ChatGPT

Training: Teaching AI with data to improve its responses

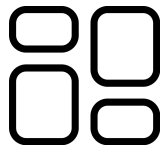

AI Platforms breakdown

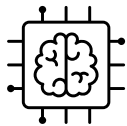

Category	Tool	Key Features	Best For
Text & Content Generation	ChatGPT	Versatile AI chatbot	General content creation, brainstorming
	Claude	Advanced AI assistant	Complex tasks, analysis
	QuillBot	AI writing tool	Paraphrasing, content enhancement
	POE	Multi-model AI platform	Diverse content needs
Visual Design & Image Generation	Fal.ai	AI image generation	Marketing, design
	DALL-E	Text-to-image generation	Custom visuals
	Ideogram	AI-powered graphics	Logo design, branding
	Canva	AI-enhanced design	Marketing materials, social media
3D Design & Modeling	Meshy	AI-powered 3D generation	Rapid 3D asset creation, game design, XR experiences
Video & Audio Production	Runway	AI video editing	Video content creation
	ElevenLabs	Voice synthesis	Custom voiceovers
	Descript	AI video/audio editing	Podcasts, video production
	Fireflies.ai	Transcription	Meeting notes, subtitles
	Speechify	Text-to-speech	Content accessibility
	Bland AI	Voice generation	Natural-sounding audio content
	Synthesia	AI video creation	Personalized video messages, training
Coding & Development	GitHub Copilot	AI pair programming	Software development
	Replit	AI-assisted coding	Coding education, prototyping
	Cursor	AI-powered code editor	Enhanced coding productivity
Data Analysis & Visualization	Gemini	AI research assistant	Data analysis, research
	Perplexity	AI search engine	In-depth research
Productivity & Workflow	Gamma	AI presentations	Sales pitches, reports
	Airtable	AI spreadsheets	Project management, notes
	MaxAI.me	AI personal assistant	Task management, productivity
Customer Relationship Management	Klipy.ai	Auto-updating CRM	Simplified sales pipeline management
	Clay	Data enrichment	Quick customer support
	Vapi	AI customer messaging	Customer service automation
Workflow Automation	Gumloop Make.com Zapier	No-code AI workflow automation	Complex business process automation, SEO, web scraping
Marketing & SEO	Apollo	Lead gen	Marketing content
	Jasper	AI content platform	Content marketing, SEO

Foundation Models
GPT-4, Claude 3.5, Llama 3

HOW TO SELECT YOUR NEXT STEP

Who to hire for AI project expertise?

MBB or Big 4

Extensive experience and resources, but high cost.

Dev shops

Specialized expertise, medium-high cost.

Industry/role/geo/category focused individuals

Niche expertise, medium cost.

Workshop instructors/coaches

Targeted training and support, lower cost.
