Prompt Engineering: How to Talk to the AIs

Huxley Peckham

Practical up-to-date AI systems you can deploy now with Tech Horizon Academy
Sunshine Coast, Queensland, Australia

Summary

I spent 18 months consulting with Australian businesses on AI implementation. Same questions every time: "Which tool?" "How do I start?" "What about compliance?"

So I built what I wish existed: Tech Horizon Academy.

It's a living platform with 1,300+ tested AI workflows that update weekly as tools change. Not a course that goes stale. Not consulting at \$20K+. Just practical systems operators can deploy now.

When new AI tools launch (including updates from Google, Open AI, Anthropic and Microsoft), we test them, map Australian compliance and hand you working templates within days.

The reality:

Big corporates are slow but have resources
Small operators move fast but lack structure

That gap is the opportunity

The Academy closes it. Weekly workshops, tested templates, live support when stuck. 500+ Australian operators already in.

The goal: level the playing field so small businesses compete through speed.

Experience

THL

Founder & AI Systems Architect
July 2024 - Present (1 year 7 months)
Australia

Founded a consultancy and applied innovation lab helping SEQ businesses integrate AI, automation, and security frameworks for measurable results — without the noise.

We bridge emerging tech with compliance, governance, and real-world business outcomes.

Highlights:

Reduced client operational costs by up to 40% through secure workflow automation and AI-enabled optimisation.

Designed and deployed AI integration and cybersecurity roadmaps across retail, construction, and professional services.

Built custom compliance frameworks and internal audit tools to help SMEs meet ISO 27001 and Essential Eight standards.

Partnered with local chambers and universities to deliver 20+ digital literacy and cyber awareness workshops.

Omniscia

3 years 3 months

Ambassador

May 2023 - January 2026 (2 years 9 months)

Online

Business Development Representative

Unizon Blockchain Technology

3 months

Strategic Partner

May 2023 - June 2023 (2 months)

Melbourne, Victoria, Australia

Strategic Consultant

April 2023 - May 2023 (2 months)

Melbourne, Victoria, Australia

Advised Unizon during its participation in the Reserve Bank of Australia (RBA) CBDC Pilot Program, one of only 14 use cases selected from over 140 submissions. Developed blockchain strategy for their "Tokenised Bills" project — a digital invoice solution using the ERC-3525 semi-fungible token standard to transform invoices into fractionalizable, high-liquidity on-chain assets payable via Central Bank Digital Currency (CBDC).

Built strategic partnerships with government agencies and financial institutions to support supply chain financing for SMEs. Established communications with the Monetary Authority of Singapore (MAS) and collaborated with Zerocap to expand stakeholder education on ERC-3525-based tokenization for real-world asset applications.

Contributed to pilot program outcomes demonstrating how blockchain-enabled digital invoices can reduce financing costs, improve capital efficiency, and enable atomic CBDC payments for Australian enterprises.

Blockchain Academy International

Head Trainer

April 2022 - April 2023 (1 year 1 month)

Noosa, Queensland, Australia

As the first trainer to develop and deliver curriculum for the nationally accredited Diploma of Applied Blockchain (10849NAT), I built course materials from the ground up when no other instructor could deliver the program — training over 150 students across blockchain frameworks, business model innovation, and emerging technology integration.

Designed and delivered comprehensive training modules covering:

Blockchain frameworks for decentralized peer-to-peer consensus and innovation

Business model generation and disintermediation strategy

Big data integration with blockchain marketing systems

Blockchain governance policy development

Application of blockchain to IoT and AI ecosystems

Team management using Agile, Scrum, and Waterfall methodologies

Delivered educational presentations, online workshops, tutorials, and hands-on seminars while providing continuous student assessment and mentorship under guidance from industry leaders in applied blockchain and deployment methodologies.

Prepared graduates for management and operational roles in organizations implementing blockchain technologies, enabling them to lead teams, develop governance frameworks, and drive digital transformation initiatives.

iLove Computers

Sales Support Technician

February 2018 - July 2018 (6 months)

Noosaville, Queensland, Australia

Ran a Genius Bar - Troubleshooted issues, booked repairs, and recommended products to customers

Attained Apple Verified Technician Status.

ITShop

Senior Sales Executive

July 2016 - April 2017 (10 months)

Noosa, Queensland

Operated tech bench, ordering and inventory management. Lead franchise expansion through training staff across the operations in collaboration with lead technician

Streamlined technical repair procedures and customer communication through education.
